

Backup & Disaster Recovery Solutions

In today's fast-paced digital landscape, any downtime can spell disaster for your brand's reputation and revenue. That's why Office1 is your ultimate shield against crises with our comprehensive Backup and Disaster Recovery (BDR) services.

BDR isn't just a safety net; it's your lifeline in the face of unforeseen events, guaranteeing uninterrupted business operations in our data-driven world. As your business grows, so does the importance of robust BDR solutions to safeguard your data.

At Office1, we've tailored our BDR services to empower mid-market businesses with the same level of protection and expertise typically reserved for large enterprises.

Here's what sets us apart:

Scalable Hardware:

We offer hardware solutions that scale with your needs, ensuring storage and computer requirements are always met. Our fault-tolerant drive arrays guarantee data survival even in the event of a hard drive failure.

Comprehensive Data Backup and Replication:

With regular full and differential backups, multiple file versions are securely saved, and restoration to dissimilar hardware is seamless.

Thorough Testing and Verification:

We conduct backup integrity testing, scheduled file restores, and periodic server recovery to virtual machines, ensuring your data is always recoverable.

Robust Security Features:

Your data's security is our top priority. We encrypt backup data both in transit and at rest, segment the network to isolate backup infrastructure, implement strong access controls, and regularly patch BDR operating systems to address vulnerabilities.

Failover and Cloud Restoration:

In the event of a hardware failure or site outage, our failover mechanisms ensure seamless restoration of backups to virtual machines or the cloud, keeping your business running smoothly.

Ready to take your business to the next level?
