

Get Covered with Backup and Disaster Recovery

Do you ever fear losing critical hard drives, files, and applications during an outage?

Take control of your business and minimize the impact of an outage on your firm with Backup and Disaster Recovery (BDR).

Office1 provides a high-grade data protection solution that includes a set of techniques and technologies your business can use to restore company files, applications, and other resources in the event of an outage.

Office1's Backup and Disaster Recovery ensures that you're protected with:

- ✓ **Data Archiving** You can keep your files and data on our private cloud for backup and instant access.
- ✓ **Data Recovery** In the event of an outage, your business will keep running with fast and efficient availability to your data.
- ✓ **Unlimited Data Storage** With our private cloud storage, you can dynamically scale instances of your company data.
- ✓ **Data Security** Your company data will be safe from breaches through SSAE compliant AES encryption for cloud and network security.
- ✓ **No Downtime** Your files and applications will not be unavailable for a long time during an outage due to our cloud services.

Reach out today to learn how we can help you drive your firm's productivity. With Office1's Backup and Disaster Recovery solution, you can have peace of mind as we offer a high-grade data protection solution.
